**AN ANALYSIS ON CYBER CRIMES**

**\*ANDUKURI ANOOP**

Cyber crime is a criminal activity which takes place through digital means. After the invention of computer the life became trouble-free to make transactions, purchasing goods, and etc through online. But this made us equally face the issues of Cyber Crimes. According to the recent survey, India recorded 21,796 cyber crimes in 2017, and a tremendous increase of 77% from 2016. Where over 50% of cyber crimes were committed for monetary gain through fraudulent means. In this digital world we have equal advantages and disadvantages as well. Finally the given research paper will discuss about the origin of cyber crimes, cyber laws in India and note worthy cases.
